Office Action Summary

Application No.

10/630,655

Applicant(s)

CRIPPS ET AL.

Examiner

Mina Haghighatian

Art Unit

1616

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 05 January 2005.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-39 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-39 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date _____
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____

Art Unit: 1616

DETAILED ACTION

Receipt is acknowledged of the response and terminal disclaimer filed on 01/05/05. Accordingly, claims 1-39 remain pending. Upon further consideration, claims have been found unpatentable in view of the cited references. Thus the new rejection is as follows.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation

under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-39 are rejected under 35 U.S.C. 103(a) as being unpatentable over Davis et al in view of Weers et al (6,309,623).

Davis et al teach aerosol solutions for drug delivery, where the system contains water, ethanol and propylene glycol. An important finding for Davis et al was that with steroidal compounds the solubility of the drug in the vehicle was of great importance. The presence of ethanol should give the vehicle solvent characteristics without changing physical characteristics (see introduction on page 85). Davis uses flunisolide as an example of a steroidal compound and shows that addition of ethanol improve delivery, and concludes that propylene glycol-ethanol and water systems show that output increases as the ratio of ethanol to propylene glycol increases (see page 91-92).

Davis et al, while disclosing steroidal compounds as a genus, lack disclosure on fluticasone as a species.

Weers et al disclose stabilized formulations for use in metered dose inhalers for aerosol delivery to the respiratory systems. The formulations are generally in a dispersion in a medium comprising hydrofluoroalkane propellants (see abstract and col. 3, lines 53-67). Weers et al also disclose a variety of active agents that can be used in

Art Unit: 1616

the said formulations and list flunisolide and fluticasone propionate as suitable candidates for the said formulations (col. 19, lines 55-67).

It would have been obvious to a person of ordinary skill in the art at the time the invention was made to have substituted one steroidal compound, fluticasone, as disclosed by Weers et al, with another steroidal compound, flunisolide as disclosed by Davis et al, and have produced effective and stable formulations for delivery. In other words, one of ordinary skill in the art would have been motivated to practice the teachings of Davis using other active agents, since Davis is clearly disclosing advantages of the solutions for aerosol delivery.

Claims 1-39 are rejected under 35 U.S.C. 103(a) as being unpatentable over Otterbeck et al (5,914,122) in view of Weers et al (6,309,623).

Otterbeck et al disclose a stable budesonide solution where budesonide is dissolved in a solvent which may be water, an alcohol such as ethanol, isopropanol or propylene glycol or mixtures thereof (see abstract and col. 2, lines 7-21). It is also disclosed that the solvents could be ethanol, isopropanol, glycerol, polyethylene glycol, propylene glycol, etc (col. 3, line 66 to col. 4, line 4). Otterbeck lacks disclosure on fluticasone propionate as the active agent.

Weers et al, discussed above, discloses fluticasone, flunisolide and budesonide as suitable active agents for aerosol delivery of the said formulations.

It would have been obvious to a person of ordinary skill in the art at the time the invention was made to have substituted one steroidal compound, fluticasone, as disclosed by Weers et al, with another steroidal compound, budesonide as disclosed by Otterbeck et al, and have produced effective and stable formulations for delivery to respiratory system. In other words, one of ordinary skill in the art would have been motivated to prepare solution formulations as disclosed by Otterbeck et al using other active agents, since Otterbeck et al clearly disclose advantages of the solutions for aerosol delivery.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mina Haghighatian whose telephone number is 571-272-0615. The examiner can normally be reached on core office hours.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gary L. Kunz can be reached on 571-272-0887. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
